

A tree on your street needs your help

Can you lend a limb?

Young trees need a bucket of water per week for at least the first three years. Please water the trees on your street to help them grow. Especially during periods of drought.

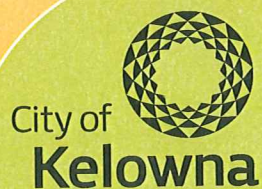

Did you know?

You can report a problem, like fallen branches and potholes, or request information through our **online or mobile service request system**.

To submit your request, visit kelowna.ca/servicerequests.

For more information, visit kelowna.ca/parks or call 250 717-2757.

A tree on your street needs your help

Leaf me my space please

Help keep the tree healthy by giving extra space between equipment (lawn mowers and string trimmers) and the tree.

Example of damaged tree due to equipment.

Did you know?

A study of urban forests shows that for each \$1 invested in planting residential trees up to \$3 in benefits is returned to residents through increased property values, removal of air pollutants, and energy savings through shade.

For more information, visit kelowna.ca/parks or call 250 717-2757.
