

Access to Justice: Challenges and Future Directions

This seminar deals with the legal barriers persons with disabilities must face and what's envisioned for improving the status quo. The main point of this lecture is anchored in our Chief Justice B. McLachlin's belief that "Nothing is more important than justice and the just society."

Basing their holistic discourse on such innovative views as the Canadian Bar Association's 2013 Youtube presentation entitled "Equal Justice: Balancing the Scales" and Melina Buckley's Reaching Equal Justice (2013) report, our speakers in-depth knowledge of our criminal justice system is impressively vast.
